

New Children's Book, "Oodles of Noodles", Teaches Toddlers to Count in a Fun, Interactive Way

[Rockville, MD] – The upcoming children's board book "Oodles of Noodles" by Jessie Atkin is set to launch on July 14, 2026. Aimed at toddlers aged 0-3, this delightful counting book introduces young readers to numbers through vibrant illustrations and playful rhyming.

"Oodles of Noodles" is designed to engage toddlers in early learning through a fun, interactive format. Each page invites children to count various foods along with different animal friends, encouraging basic numeracy skills and fostering a love of reading from an early age. Perfect for parents looking to introduce their toddlers to educational concepts, "Oodles of Noodles" offers a colorful and captivating experience.

"As a first time aunt, my niece was the true inspiration behind Oodles. I wanted to write something just for her, though, of course, I also wanted it to be something I would enjoy reading as well. As a kid I was always a fan of early books that rhymed."

The book will be available on Amazon, Barnes and Noble, bookshop.org, Books-a-Million, Hudson Booksellers, Walmart, and through Little Bee Books at Simon and Schuster. Pre-orders are available now.
